

## **Goff Wind Turbine Tower Shot Blaster**

Goff Pass Thru Wind Turbine Tower Shot Blaster during installation at customer's facility. Goff Shot Blast Equipment is capable of blasting the O.D. of tower sections prior to painting or coating to provide the surface with the necessary profile for proper paint and coating adhesion. Goff also makes steel plate blast machines capable of blasting 10' X 40' flat steel plate up to 6" thick shot blasting both sides at the same time.
